IMPORTANT SAFETY INSTRUCTIONS

PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE TECHNOLOGY

■ Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave technology. It is important not to tamper with the safety interlocks.
■ Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.
■ Do not operate the oven if it is damaged. It is very important that the oven door closes properly and that there is no damage to the
  a) Door (including any dents),
  b) Hinges and latches (broken or loosened),
  c) Door seals and sealing surfaces.
  The oven should not be adjusted or repaired by anyone except qualified service personnel.

⚠ WARNING

To reduce the risk of burns, electric shock, fire, injury to persons or exposure to excessive microwave technology:

■ Read all instructions before using the appliance.
■ Read and follow the specific "PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE TECHNOLOGY" on page 1.
■ This appliance must be grounded. Connect only to properly grounded outlet. See "GROUNDING INSTRUCTIONS " on page 3.
■ Do not operate the oven when empty.
■ Install or locate this appliance only in accordance with the provided installation instructions.
■ Some products such as whole eggs and sealed containers -for example, closed glass jars- are able to explode and should not be heated in this oven.
■ Use this appliance only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in this appliance. This type of oven is specifically designed to heat, cook, or dry food. It is not designed for industrial or laboratory use.
■ As with any appliance, close supervision is necessary when used by children.
■ To reduce the risk of fire in the oven cavity:
—Do not overcook food. Carefully attend appliance when paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
—Remove wire twist-ties from paper or plastic bags before placing bag in oven.
—If materials inside the oven should ignite, keep oven door closed, turn oven off using the circuit breaker panel, and call

SAVE THESE INSTRUCTIONS

emergency services.

■ Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils or food in the cavity when not in use.

■ Liquids, such as water, coffee, or tea are able to be overheated beyond the boiling point without appearing to be boiling due to surface tension of the liquid. Visible bubbling or boiling when the container is removed from the microwave oven is not always present. This could result in very hot liquids suddenly boiling over when a spoon or other utensil is inserted into the liquid.

■ To reduce the risk of injury to person:

—Do not overheat the liquid.

—Stir the liquid both before and halfway through heating it.

—Do not use straight-sided containers with narrow necks.

—After heating, allow the container to stand in the microwave oven for a short time before removing the container.

—Use extreme care when inserting a spoon or other utensil into the container.

■ Do not heat oil or fat for deep-frying. It is difficult to control the temperature of oil in microwave oven.

■ Do not cover or block any openings on the appliance.

■ Do not operate this appliance if it has a damaged cord or a plug, if it is not working properly or if it has been damaged or dropped.

■ Do not immerse cord or plug in water. Keep cord away from heated surface. Do not let cord hang over edge of table or counter.

■ This appliance should be serviced only by qualified service personnel, contact nearest authorized service facility for examination, repair, or adjustment.

■ When cleaning surfaces of door and oven that comes together on closing the door, use only mild, nonabrasive soaps, or detergents applied with a sponge or soft cloth.

■ Oversized food or oversized metal utensils should not be inserted in a microwave/toaster oven as they may create a fire or risk of electric shock.

■ Do not store or use this appliance outdoors. Do not use this product near water, for example, near a kitchen sink, in a wet basement, near a swimming pool, or similar locations.

■ Do not clean with metal scouring pads. Pieces can burn off the pad and touch electrical parts involving a risk of electric shock.

■ Do not use paper products when appliance is operated in the toaster mode.

■ Do not store any materials, other than manufacturer's recommended accessories, in this oven when not in use.

■ Do not cover turntables, pans or any other part of the oven with metal foil. This will cause overheating of the oven.

■ This equipment has been tested and found to comply with Part 18 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular

installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

GROUNDING INSTRUCTIONS

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces risk of electric shock by providing an escape wire for the electric current. This appliance is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

Consult a qualified electrician or serviceman if the grounding instructions are not completely understood, or if doubt exists as to whether the appliance is properly grounded, and if it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-blade grounding plug and a 3-slot receptacle that will accept the plug on the appliance. The marked rating of the extension cord shall be equal to or greater than the electrical rating of the appliance.

Electrical Requirements

The electrical requirements are a 120 volt 60 Hz, AC only, 20 amp. It is recommended that a separate circuit serving only the oven be provided. The oven is equipped with a 3-prong grounding plug. It must be plugged into a wall outlet properly installed and ground.

Power Cord

—A short power supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.

—Longer cord sets or extension cords are available and may be used if care is exercised in their use.

—If long cord or extension cord is used:
  a) The marked electrical rating of the cord set or extension cord should be at least as great as the electrical rating of the appliance.
  b) The extension cord must be a grounding-type 3-wire cord, and The longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over accidentally.

INSTALLATION GUIDE

■ Make sure that all the packing materials are removed from the inside of the door.

■ This microwave oven must be placed on a flat, stable surface.

■ For correct operation, the oven must have sufficient airflow. Allow minimum 8 inch (20.32cm) of free space necessary above the top surface of the oven and 2 inch (5.08cm) at both sides. Do not cover or block any openings on the appliance. Do not remove feet.

■ The appliance shall be only used on a countertop over 3 feet (91.44cm) above the floor.

■ Do not place the oven where heat, moisture, or high humidity are generated, or near combustible materials.
■ Make sure that the power cord is undamaged and does not run under the oven or over any hot or sharp surface.

■ The socket must be readily accessible so the microwave oven can be easily unplugged in an emergency.

COOKING UTENSILS GUIDE

This section lists which utensils can be used in this microwave, which have limited use for short periods, and which should not be used in this microwave.

RECOMMENDED

Microwave browning dish — Use to brown the exterior of small items such as steaks, chops, or pancakes. Follow the directions provided with your browning dish.

Microwaveable plastic wrap — Use to retain steam. Leave a small opening for some steam to escape and avoid placing it directly on the food.

Paper towels and napkins — Use for short-term heating and covering; these absorb excess moisture and prevent spattering. Do not use recycled paper towels, which may contain metal and could ignite.

Glass and glass-ceramic bowls and dishes — Use for heating or cooking.

Paper plates and cups — Use for short-term heating at low temperatures. Do not use recycled paper, which contain metal and could ignite.

Wax paper — Use as a cover to prevent spattering.

Thermometers — Use only those labeled "Microwave Safe" and follow all directions. Check the food in several places. Conventional thermometers may be used on microwave food once the food has been removed from the oven.

LIMITED USE

Aluminum foil — Use narrow strips of foil to prevent overcooking of exposed areas. Using too much foil can damage your oven, so be careful. You should keep distance of 1 inch (2.54cm) between aluminum foil and cavity.

Ceramic, porcelain, and stoneware — Use these if they are labeled "Microwave Safe". If they are not labeled, test them to make sure they can be used safely.

Plastic — Use only if labeled "Microwave Safe". Other plastics can melt.

NOT RECOMMENDED

Glass jars and bottles — Regular glass is too thin to be used in a microwave. It can shatter and cause damage and injury.

Paper bags — These are a fire hazard, except for popcorn bags due on food.

Styrofoam plates and cups — These can melt and leave an unhealthy residue on food.

Plastic storage and food containers — Containers such as margarine tubs can melt in the microwave.

Metal utensils — These can damage your oven. Remove all metal before cooking.

Note:
Should you wish to check if a dish is safe for microwaving, place the empty dish in the oven and microwave at high power level for 30 seconds. A dish which becomes very hot should not be used.

CLEANING AND CARE

■ Turn off the oven and unplug the power cord from the wall when cleaning.
■ Keep the inside of the oven clean. When food splatters or spilled liquids adhere to oven walls, wipe with a damp cloth. Mild detergents may be used if the oven gets very dirty. Avoid using spray or other harsh cleaners. They may stain, streak or dull the door surface.

■ The outside of the oven should be cleaned with a damp cloth. To prevent damage to the operating parts inside the oven, water should not be allowed to seep into the ventilation openings.

■ Wipe the door and window on both sides, the door seals and adjacent parts frequently with a damp cloth to remove any spills or spatters. Do not use abrasive cleaner.

■ Do not allow the control panel to become wet. Clean with a soft, damp cloth. When cleaning the control panel, leave oven door open to prevent oven from accidentally turning on.
■ If steam accumulates inside or around the outside of the oven door, wipe with a soft cloth. This may occur when the microwave oven is operated under high humidity condition. And it is normal.

■ It is occasionally necessary to remove the non-stick turntable, silicone mat and air fry kit for cleaning. Wash them in warm sudsy water.
■ If the light bulb burns out, please contact customer service to have it replaced.

■ The oven should be cleaned regularly and any food deposits should be removed. Failure to maintain the oven in a clean condition could lead to deterioration of surface that could adversely affect the life of the unit and could possibly result in a hazardous situation.

■ Please do not dispose of this appliance into the domestic rubbish bin; it should be disposed to the particular disposal center
