Classification	This chemical is not considered hazardous by the 2012 OSHA Hazard Communication Standard (29CFR 1910.1200) this product is an article which is a sealed battery and as such does not require an MSDS per the OSHA hazard communication standard unless ruptured. The hazards indicated are for a ruptured battery.
-----------------------	--

Skin corrosion/irritation	See section 8 for exposure controls In the event that this battery has been ruptured, the electrolyte solution contained within the battery would be corrosive and can cause burns
Serious eye damage/eye irritation	The steam of the electrolyte may stimulate eyes. Especially, substance that may cause inflammation of the eyes is contained
Skin sensitization	The leakage of the electrolyte may cause sore and stimulation on the skin
Carcinogenicity	Inhalation of materials from a sealed battery is not an expected route of exposure. Vapors or mists from a ruptured battery may cause respiratory irritation
Specific target organ toxicity (repeated)	Swallowing is not anticipated due to the battery size. The ingestion of the electrolyte causes tissue damage to throat
