the Genius Countertop Microwave Oven

Genius Microwave

With the touch of our **Sensor Cooking** button, this microwave takes guesswork out of creating a great meal, by automatically setting power levels and adjusting cooking or defrosting time. The sensor measures the amount of steam produced during cooking, and signals the microprocessor to calculate the remaining cooking time at the appropriate power level automatically.

INVERTER Technology

Panasonic **Inverter Technology** perfects the art of cooking with microwave ovens, delivering delicious flavor, excellent color, superb shape and texture in the foods you cook. The consistent delivery of microwave energy means delicate foods can simmer without the edges and surfaces overcooking. Foods have the look, nutrient level and taste you expect – without the wait!

Braised Baby Bok Choy

Menu Action Screen (multi-lingual)

The Menu Action Screen is like having a chef to assist you in the kitchen. It scrolls step-by-step cooking instructions across the display, in a choice of English, Spanish or French.

Inverter Turbo Defrost™

Panasonic evolved the Turbo Defrost™ feature, which allows you to defrost foods even faster than previous Panasonic Auto Defrost. Panasonic Inverter Turbo Defrost technology is an advanced microwave sequencing system using the inverter continuous-power delivery method.

One-Touch Genius Sensor Cook and Reheat

The Genius Sensor adjusts power levels and calculates cooking and reheating times **automatically** for various food types.

Keep Warm Feature

A pulsing delivery of very low microwave power keeps food temperatures at a constant level – without overcooking. So, foods like stew, gravy and desserts remain warm in the oven until ready to serve.

Function Key

The Function Key simplifies the programming of 10 useful, non-cooking functions. Just press the Function Key and the Menu Action Screen will display easy-to-follow steps to complete the desired function.
