# Using pureAir FRIDGE

1. Turn pureAir FRIDGE on by pressing the ON/OFF Button once.
  - The Light flashes Green to show pureAir FRIDGE is on.
  - If the Light doesn't flash Green, charge pureAir FRIDGE (see below).
2. Place pureAir FRIDGE anywhere in your refrigerator.
  - Take care not to put anything against the Top Air Vent or Rear Air Intake.
3. Turn pureAir FRIDGE off by pressing the ON/OFF Button again.

Note: The Light always flashes green whenever the refrigerator door is open and pureAir FRIDGE has enough charge. The Light turns off automatically whenever the refrigerator door is closed to preserve battery life, but pureAir FRIDGE is still working.

## Charging

Beeping and a Red Indicator Light tell you that pureAir FRIDGE needs charged. Connect a powered Micro-USB Cable to the USB Charging Port. pureAir FRIDGE is charged and ready when the USB Charging Port Light changes from Red to Green.

Initial charging time varies and can take up to eight hours, so you might simply let it charge overnight. After this first charge, it will only take four to six hours to charge. The charge will last about three weeks before needing to be charged again!

## Keeping pureAir FRIDGE Clean

**It is best to clean pureAir FRIDGE every 6 months.**

1. Remove pureAir FRIDGE from your refrigerator and turn it off.
2. Vacuum out the Rear Air Intake and the Top Air Vent.

Note: Blowing air into the Rear Air Intake or Top Air Vent in order to clean pureAir FRIDGE is not advised. Doing so may limit the quality of the purified air produced by pureAir FRIDGE.

3. Dip a cotton swab in isopropyl alcohol and insert it into the Top Air Vent. Gently rotate the swab and clean the entire area until all visible contamination has been removed. Use a clean cotton swab to dry the cleaned area. Repeat with the Rear Air Intake.
4. Wipe down the outside of pureAir FRIDGE with a damp cloth.
5. Let pureAir FRIDGE dry before charging or resuming operation.
