SECTION 4. FIRST AID MEASURES

If inhaled : IF INHALED: Move person to fresh air. If person is not breath-

ing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control

center or doctor for further treatment advice.

mediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any-

thing by mouth to an unconscious person.

Most important symptoms and effects, both acute and delayed

Notes to physician

None known.

: Probable mucosal damage may contraindicate the use of gas-

tric lavage.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media Specific hazards during firefighting Water only.

zards during firefighting : During a fire, irritating and highly toxic gases may be generat-

ed by thermal decomposition or combustion.

Closed containers may explode (due to the build up of steam

pressure) when exposed to extreme heat.

Further information : Use water to cool containers exposed to fire. On small fires,

use water spray or fog. On large fires, use heavy deluge or fog streams. Flooding amounts of water may be required

before extinguishment can be accomplished.

Do not use dry extinguishers containing ammonium com-

pounds.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Response to a large quantity spill (100 pounds or greater) or when dusting or decomposition gas exposure could occur requires the use of a positive pressure full face supplied air repirator or self contained breathing apparatus (SCBA), chemical resistant gloves, coveralls and boots. In case of fire, this

personal protective equipment should be used in addition to normal fire fighter equipment.

Compatible materials for response to this material are: neo-

prene.

Protection concerns must also address the following: If this material becomes damp/wet or contaminated in a container, the formation of nitrogen trichloride gas may occur and an

explosive condition may exist.

Hazardous concentrations in air may be found in local spill

area and immediately downwind. Remove all sources of ignition.

Stop source of spill as soon as possible and notify appropriate

personnel.

For disposal considerations see section 13.

Environmental precautions : If the product contaminates rivers and lakes or drains inform

respective authorities.

Methods and materials for contain-

ment and cleaning up

Sweep up and shovel into suitable containers for disposal.

Avoid dust formation.

SECTION 7. HANDLING AND STORAGE

Advice on safe handling : Avoid inhalation of dust and fumes.

Do not take internally. Avoid contact with skin, eyes and clothing. Upon contact with skin or eyes, wash off with water. Remove contaminated clothing and wash before reuse.

Conditions for safe storage : Keep product tightly sealed in original containers. Store prod-

uct in a cool, dry, well-ventilated area. Store away from combustible or flammable products. Keep product packaging clean and free of all contamination, including, e.g. other pool treatment products, acids, organic materials, nitrogencontaining compounds, dry powder fire extinguishers (contain-

ing mono-ammonium phosphate), oxidizers, all corrosive liq-

uids, flammable or combustible materials, etc.

Materials to avoid : Do not allow product to come in contact with other materials, including a great product product a golds, organic

including e.g. other pool treatment products, acids, organic materials, nitrogen-containing compounds, dry powder fire extinguishers (containing mono-ammonium phosphate), oxidizers, all corrosive liquids, flammable or combustible materials, etc. A chemical reaction with such substances can cause

a fire.

Engineering measures : Local exhaust ventilation or other engineering controls are

normally required when handling or using this product to keep airborne exposures below the TLV, PEL or other rec-

ommended exposure limit.

Personal protective equipment

Respiratory protection : Wear a NIOSH approved respirator if levels above the expo-

sure limits are possible.

A NIOSH approved full-face air purifying respirator equipped with combination chlorine/P100 cartridges. Air purifying respirators should not be used in oxygen deficient or IDLH atmospheres or if exposure concentrations exceed ten (10) times

the published limit.

Hand protection

ous suit is recommended if exposure is possible to a large

portion of the body.

Eye protection : Use chemical goggles.

Skin and body protection : Nitrile

Natural Rubber

Neoprene (This includes: gloves, boots, apron, protective

suit)
