IMPORTANT!

TO REDUCE RISK OF INJURY:

Before any use, be sure everyone using this tool reads and understands all safety instructions and other information contained in this manual.

This hose reel is for outdoor home applications only. Use only cold water. Not for commercial applications.

Before use, ensure the hose reel is securely mounted to the mounting device. Regularly inspect the mounting device and hose reel casing for signs of undue wear.

Do not mount the hose reel in a location that is deficient of any shade. Excess heat from the sun may result in wear and possible damage of the hose reel.

Do not allow children near the hose reel at any time.

Once the hose reel is mounted, do not apply any extra weight to the unit. This may result in breakage to the unit or the mounting device.

Save these instructions and review frequently prior to use and when instructing others.

When rewinding the hose, always slowly walk it back to the reel. Never let go of the hose while it is rewinding.

Always turn off the water at the tap when the hose reel is not in use. Release any remaining water from the hose before leaving for storage.

During winter or when the temperature reaches 32 degrees Fahrenheit or colder, remove the hose reel from the mounting device and store indoors. Leaving the hose reel out during extreme weather will result in wear and possible damage to the hose reel, voiding the warranty.

Store the metal hose nozzle indoors in a cool, dry place when not in use.

DANGER!

Choking hazard. Small parts. Keep away from small children.

Risk of scalding if hose is exposed to direct sunlight for a long period.
