## C O M M E R C I A L

The **Energy Labeling Rule**<sup>i</sup> requires manufacturers of **certain** appliances to disclose a product's annual energy cost or efficiency information on EnergyGuide labels based on Department of Energy (DOE) test procedures and to report their findings to the Federal Trade Commission (FTC).

The bright yellow EnergyGuide labels for covered products contain three key disclosures: Estimated annual energy cost; a product's energy consumption or energy efficiency rating as determined from Department of Energy (DOE) test procedures; and a comparability range displaying the highest and lowest energy costs or efficiency ratings for all similar models.

The Energy Labeling Rule applies to consumer products, i.e. appliances distributed in commerce for personal use. Commercial Refrigerated Display Units and Commercial Storage Cabinets are not subject to the same Energy Labeling Rule.

This product complies with UL Safety Standards and requirements for Food Service Refrigerators and Storage Freezers (ANSI/NSF-7). It has also been tested to meet the DOE's Commercial energy standards for commercial appliances in its size and product class category.

Manufacturers of covered products and equipment subject to Federal conservation energy standards are required to certify the products with the Department of Energy via the Compliance Certification Management System. The energy data for this model is available on CCMS database<sup>ii</sup>.

If you require additional information about this product and its energy usage, contact us at [info@summitappliance.com](mailto:info@summitappliance.com)
