Slip Resistant Treatment for Tile and Stone

Ideal for use on: Tile, Stone, Concrete, and more...

InvisiTread®

Take Action. Gain Traction®

InvisiTread® increases slip resistance without changing the look, feel or color of most surfaces.

Application

Step 1: Clean, rinse and dry area. Try to leave grout joints wet. Use TractionWash™ for optimum results.

Step 2: Apply InvisiTread® liberally to surface using either a sponge, sponge mop or sprayer. (Air pump sprayer for larger areas) Test small hidden area first for desired dwell time. Start with 6-8 min. for tile (3-5 min. for shiny tiles) Test area with foot and water for desired slip resistance after rinsing

Step 3: Rinse surface thoroughly with 1:5 dilution of Traction Wash to remove residue material.

- Do not apply to grout that has cured for less than 30 days
- It is recommended that grout is sealed prior to application
- Dark colored grout might experience a change in color.
- Area may be used immediately.
- Always test small hidden area first
- Not for use on Polished Marble
