

Use and Care Manual for Artificial Dracaena Tree Set

1. Product Overview

This artificial Dracaena tree set includes a meticulously proportioned fake tree, a coordinated planter, and artificial moss, offering a complete decor solution. Crafted from polyester, plastic, and wire stems, it mimics real plants with natural colors and textures, requiring no maintenance for year-round greenery.

2. Unboxing & Setup

A. Initial Assembly

1. **Remove Packaging:** Gently unpack the tree, planter, and moss. Check for any shipping-related indentations (common and easily fixable).
2. **Shape the Tree:**
 1. Bend and separate wire stems to fluff branches and leaves, following the natural growth pattern of Dracaena.
 2. Adjust height and fullness by spreading out compacted foliage until the desired look is achieved.
3. **Base Installation:**

1. Place the tree in the included planter. Fill the base with decorative stones (optional) for stability.
2. Spread the artificial moss around the base to cover any gaps and enhance realism.

3. Placement Guidelines

A. Indoor Use

- **Ideal Locations:** Display in living rooms, offices, entryways, or corners with moderate indirect light to highlight its natural colors.
- **Avoid Direct Sunlight:** Prolonged exposure may cause gradual fading. Rotate the tree occasionally for even light distribution.
- **Pet Safety:** While non-toxic, keep pets from chewing on leaves (wire stems may pose a choking hazard).

B. Decor Coordination

- Pair with other artificial plants or natural elements (e.g., wooden trays, ceramic pots) for a layered, organic look.
