

Welcome home

Meet the Nest Thermostat

Touch bar

Swipe up or down to change the temperature. Tap to bring up the menu.

Status and alerts

Current heating or cooling mode and system alerts.

Target temperature

The temperature you want to reach.

Current temperature

The temperature in your home.

Tap the touch bar to bring up the menu.

Modes

Change modes, like heating and cooling.

Hold

Keep a specific temp for a certain amount of time.

Fan

Getting stuffy? Use the fan whenever you want.

Settings

Check your battery and network status.

Make the most of your new Nest Thermostat

Here are some quick tips to help get you started with your Nest Thermostat. To learn more visit [g.co/nest/thermostatbasics](https://www.google.com/nest/thermostatbasics)

Fine-tune your comfort.

When you set up your Nest Thermostat, customizing your schedule is fast and easy. And you can always make adjustments from the Google Home app.

Heating and cooling system care.

HVAC monitoring looks out for many heating and cooling system issues. If something doesn't seem right, it can send you an alert.* If you need to replace your air filter, you'll get a reminder. And you can book a visit with a Nest Pro right from the alert.

Look for the Nest Leaf.

It appears when you change the Nest Thermostat to an energy-saving temperature.

Save energy when you're away.

The Nest Thermostat can use sensors and your phone's location to check if you've left the house. Then it can set itself to an Eco temperature to save energy.

Finds ways to help you save.

Savings Finder looks for more ways to save, and suggests tweaks to your schedule. You can accept the suggestions with a tap.

Every Nest product makes your home even more helpful

Control your thermostat with your voice.

The Nest Thermostat works with Hey Google on your phone, or Nest speakers and displays. Just say, "Hey Google, turn up the heat." The Nest Thermostat also works with Alexa and other smart speakers and displays.

Nest products work even better together.

For example, if your Nest Protect senses CO, it can tell your Nest Thermostat to stop the furnace from running.

*These alerts are meant to provide you with helpful information, but Google makes no endorsement, representation, or warranty about the health of eligible HVAC systems. These alerts should not replace a diagnosis by a qualified HVAC professional.

Control from anywhere

You can change the temperature, adjust your schedule, and more from your phone or tablet. Just get the free Google Home app from Google Play or the App Store.[™]
