ABOUT PRO PRODUCTS

Pro Products LLC, was established in 1995 and provides reliable, high quality, cost effective solutions for various water professional's needs. The water treatment specialists at Pro Products offer a wide range of solutions that focus on rectifying problems, testing, cleaning stains, and maintaining the performance of water quality equipment. Pro Products is [ISO 9001:2015 certified](#) and a trusted and recognized brand in the industry.

Our water treatment specialists formulate, manufacture, package, and market our products worldwide from Fort Wayne, Indiana through an authorized distributor base. We maintain a stringent research and development program, ensuring the most reliable and effective chemicals to meet the professional's water quality needs. It is our mission to provide the highest quality product on-time with the best possible value. Let our water treatment specialists help you with all of your water needs.

SUSTAINABILITY

Striving for the perfect balance between People, Planet and Profit!

OUR MISSION

Our corporate mission is "Enthusiastically exceeding customer expectations through innovation and continuous improvement"

To learn more from the leading water treatment specialists, call 1-866-357-5063 or [contact us online](#).

OUR BUSINESS PRACTICES & COMMUNITY INVOLVEMENT

We take sustainability and our commitment to the community and the environment very seriously. We began our initiative by implementing recycling programs at our facilities, incentivizing employees to submit and implement sustainable and cost effective ideas, and establishing goals for reducing our corporate greenhouse gases, solid waste generation and water usage. We are also encouraging our suppliers to do the same.

Pro Products continues to support and contribute to the local community through programs such as United Way, The Community Harvest Food Bank, The Salvation Army and the Fort Wayne Trails Towpath project. In April 2012, our employees and their families participated in tree planting at Eagle Marsh, a local wetland, to celebrate Arbor Day.

OUR PRODUCTS

When developing our products, we focus on integrating safety and sustainability by evaluating the entire product lifecycle and optimizing the amount of packaging used, ensuring that our bottles are recyclable and contain post-consumer recycled content wherever possible and implementing greener chemistry into our products, while improving performance for our customers.

OUR GOALS

When developing our products, we focus on integrating safety and sustainability by evaluating the entire product lifecycle and optimizing the amount of packaging used, ensuring that our bottles are recyclable and contain post-consumer recycled content wherever possible and implementing greener chemistry into our products, while improving performance for our customers.

Reduce absolute Scope 1 and 2 Greenhouse Gas Emissions 10% by the end of 2015

Progress: EXCEEDED GOAL. Reduced our absolute Scope 1 and 2 GHG emissions by 32% from 2010-2015. We were able to achieve this through consolidation of our distribution production locations into a newly retrofitted energy-efficient facility. In normalized measurement, this allowed Pro Products LLC to decrease our GHG intensity per FTE by 22% from 2010-2015.

Reduce absolute solid waste to landfill 10% by the end of 2015

Progress: EXCEEDED GOAL. Reduced our solid waste to the landfill by 78% from 2011-2015. This was accomplished by significantly enhancing our recycling program and consolidating our production distribution facilities.

Reduce absolute water usage 15% by the end of 2015

Progress: EXCEEDED GOAL. Reduced our water usage by 45% from 2011-2015. This was accomplished by upgrading to a more water efficient sprinkler system.

ENVIRONMENTAL POLICY

Pro Products is committed to doing well by doing good in our business and the community.

We pledge to work to prevent pollution, continually improve toward our environmental objectives and to comply with applicable regulations.

ISO 14001 CERTIFICATION

In November 2011, Pro Products received an [ISO 14001 Certification](#) to help drive and manage our environmental compliance and sustainability efforts through a formal and organized environmental management system (EMS). This framework has allowed us to manage our goals through the use of metrics and reviews by top management, drive continual improvement, and meet and exceed our customer and consumer expectations. As a leader in protecting the environment, Pro Products' EMS has been registered to ISO 14001 at all of its Fort Wayne, Indiana locations.

For over ten years Pro Products has continually strived to offer the highest quality professional grade products to its customers
