I'm Home!

Born in Florida, for the last 12 months I've been raised on the best soil, food, and water by more than 100 humans who love me dearly. Help me settle into my new home by placing me in bright, indirect light. Spoil me with loving care, and watch me grow.

MY FAVORITE THINGS

LIGHT: Medium bright indirect sunlight

TEMPERATURE: I enjoy lounging indoors in 45° to 85° F but keep me away from cold drafts, air conditioning or heating vents, and hot surfaces like radiators or furnaces

HUMIDITY: I prefer humidity levels of at least 50%. Mist me daily using a spray bottle of distilled water if the air is dry.

WATER: Allow my soil to dry out slightly between watering's but please don't give me too much to drink - my roots will thank you!

FOOD: Feed me half-strength houseplant fertilizer monthly during spring and summer
