

Installation Guide for Metal Pyramids, Finial Globe, and Pineapple*

Step 1: Place Post Cap on Post

Place the metal pyramid or metal finial snugly on top of the post.

Step 2: Screw Post Cap to Post

Use a Philips head (electric screw driver) to screw the supplied screws into the TWO mounting holes on each side of the post cap or finial.

Note: An electric screwdriver is not necessary. If you do not have an electric screw driver you can screw the screws into the wood post by hand with a little extra force and effort.

FAQ

Q: Will the copper caps patina to a green color over time?

A: Yes, since our product is 100% copper they will patina to the green color over time.

Q: Do I have to do anything to the Stainless steel to keep it shiny?

A: No, it will remain shiny.
