

50AMP Generator Cord

The most common application of this 50 amp extension cord is to temporarily supply power from the generator to the manual switch box. This heavy-duty 50 Amp 125/250 Volt power cord is compatible with generators utilizing a 14-50R outlet and enables an easier reach from your generator to your nearest power receptacle or electrical connection.

- 50A Pure Copper Cable
- 30FT Power Cord
- Twist Locking Design
- Portable Strap

12000W High Performance

The cord has a configuration of 50 amp 125/250 volts with a max rating of 12000 watts. With these traits, our locking power cord allows you to connect the campground or park power to your RV, Motorhome, Trailer, or vehicle with a built-in SS2-50P inlet.

30 FT Reliable Cable

The cable is 30 ft in length and suitable for long-distance work. This power transfer switch kit for a generator can be used indoors and outdoors in bad weather with temperatures ranging from -4°F to 140°F.

Detachable Connector for Easily Exchange

The female connector can be easily exchanged with any 50A 4-holes connector when needed. The plug adopts the locking structure. These connections are very strong and will not loosen or break during high winds, heavy rains, and blizzards.

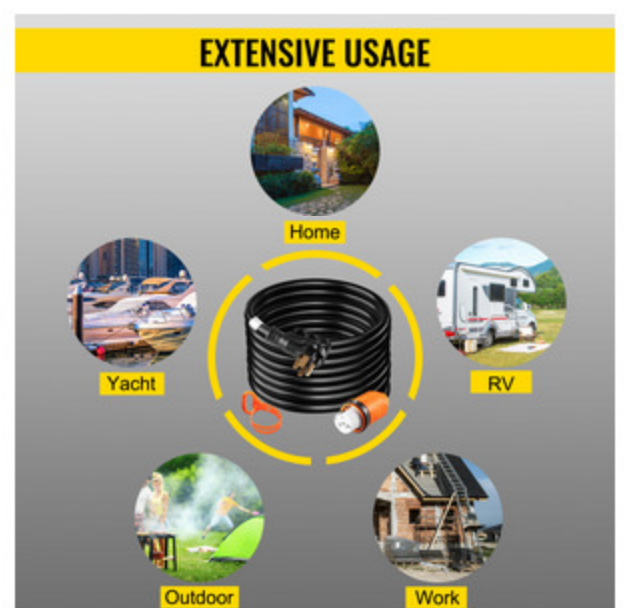

Practical Plastic Strap

The adjustable power cord organizer is a carry strap handle hanger. This strap can make the extension cords hang neatly for storage. It is easy to store our 50 amp cord in your RV cabinet or Garage.

Ergonomic Grip

The professional disconnect handle plug gives you comfortable and easy gripping, plugging, and unplugging without slipping. The strain relief structure makes the 50 amp generator power cord not easy to break.

Extensive Usage

The generator cord 50 amp is secure for use with plug adaptors and extenders. You can use our cord to connect to a generator. And it is perfect for camping, tailgating, outdoor and sporting when meet hurricane season, and other bad weathers.
