

1. Center the burst or perforation in one housing member.

2. Close the two housing members firmly.

3. Engage latch mechanism.

4. Close the device with a firm squeeze or grip.

5. Fully installed once you hear click.

THE QUICK, EASY AND PROFESSIONAL WAY TO TEMPORARILY REPAIR A BURST, ACCIDENTALLY PERFORATED WATER PIPE OR LEAKY FITTING

- Instant temporary repair
- Easy closing action
- Sized for copper tubing (CTS standard)
- Can accommodate split, damaged, and some fittings
- In most cases can allow pipe to be kept in use until a permanent repair can be arranged
- Made from NON-TOXIC materials
- Can be used on metal and plastic pipes
- No tools required
