

Every version of the Open Goaaal can be used by players of any age and skill level, since it also functions as a rebounder and backstop. We recommend getting the largest size Open Goaaal that your yard has the space to accommodate, however, if you would like to match the goal size with the player's age group, here are some recommendations:

Ages 12 and Over:

Regulation (24' x 8') or Large (16' x 7') or Standard (9' x 5')

Ages 8 - 12 :

Large (16' x 7') or Standard (9' x 5')

Ages 6 - 7 :

Standard (9' x 5') or Junior (8' x 4.5')

Ages 4 - 5 :

Junior (8' x 4.5') or Starter (6' x 4')

Open Goaaal is designed to be installed in areas that have grass and dirt. If your artificial turf installation is on concrete or has gravel below it, the Open Goaaal installation instructions do not accommodate this type of installation.

Regulation (24' x 8') : NOT ADJUSTABLE

Large (16' x 7') : ADJUSTABLE WIDTH (22'-29' backstop)

Standard (9' x 5') : ADJUSTABLE WIDTH (11.5'-21' backstop)

Junior (8' x 4.5') : NOT ADJUSTABLE

Starter (6' x 4') : NOT ADJUSTABLE

The first time you setup your Open Goaaal, it should take about 1.5 hrs with two people. It is very important to follow the instructions carefully and you can also watch the setup video provided on the front pages of the assembly instructions.
