

Curtain Ring Installation Guide

1. Count the number of pleats in the curtains and allow one ring for each pleat plus one for each curtain edge on the curtain rod. For clip-on rings, use one ring for every 6 to 8 inches of curtain width, plus one for each curtain edge. For example, if the flat curtain is 60 inches wide, use 9 to 12 clip rings.
2. Slide curtain rings onto curtain rod.
3. For rings with eyelet openings, use drapery pins to attach curtains to rings.
