

How will my hunting experience be better?

By providing you with a safe, solid, no-rust/no-rot, keep you out of the weather blind that allows you to spend more quality time in the field.

What is it made of?

Durable, all-weather polyethylene for years of maintenance free use.

How long will it take to assemble?

It comes' fully assembled. There are no seams, panels, or parts. This makes for a stronger, quieter blind. This is the advantage of "Solid Blind Technology."

What is the floor made of?

The same material as the side and roof, this is one solid piece.

How can I elevate ?

By simply using 4x4 posts for legs, It can be used as a ground blind or you may build your own platform to set it on. This is one versatile unit!

How do I fasten the S.C. to the ground?

We strongly recommend you to secure the blind to the ground for your safety and to protect your investment. We offer an Anchor Kit that allows you to quickly and easily fasten the blind to the ground. If you prefer not to purchase the Anchor Kit, there are several other ways to safely secure the unit.

I live in snow country....what about the snow load on the roof?

Because of our Solid Blind Technology, snow weight is no problem. Unlike some of our competitor's that make you purchase a "Snow Pole" to support their roof so it does not cave in.

Does it come with a warranty?

We do not have written warranty. We will however, replace and defects in material or workmanship. We do not cover acts of God.

How do your windows work?

They are designed to fold down, out of the way. It is completely silent and uses the same "Quiet Seal Technology" as the door. The window is an all-weather acrylic, and is held closed with a spring-loaded latch. We do not use sliding windows because they have been known to be noisy, can freeze shut, and restrict gun movement.

Is loud inside when you shoot a firearm?

No. With the barrel pointed out the window (we do not recommend discharging the firearm inside the unit!) the solid wall of the unit actually acts as protection from the blast.

How long will the blind last?

The model has UV protection built-in. Our engineers say 15 years+

Can I use a heater in the unit?

Only if approved for indoor use, a tent heater is an example. There are several nice units approved for indoor use. We recommend that you keep at least one window open for proper ventilation. If you ever experience dizziness or headache, immediately turn off the heater, open all windows and very carefully, exit the blind.
