

Measuring Tips

1. Shade widths are outer dimensions (bracket to bracket), the fabric will be 2" narrower than the outside dimensions (2.5" for PE fabric)
 - Example: a 48" outer dimension will have a fabric width of 46"

2. Product dimensions (when rolled up):

3. Required dimensions above/behind shades for installation:

(Pole, PE Fabric)
Wall/Ceiling: 1.5" Width

(Pole, PVC Fabric)
Wall/Ceiling: 1.5" Width

(Pole/Motor with Valance)
Wall: Above, 1"

(Pole/Motor with Valance)
Ceiling: Behind, 1"
