

40076 / 40101 CAST IRON GRATES

This cast iron grate goes in the bottom of your stove to allow air to flow into the fire and ashes to pass down to the ash pan.

	ITEM	USED ON	DESCRIPTION
	40076	all 2941 series circulators	Heavy duty cast iron
	40101	all 2827 series, 2350 circulators, and Ashley Coal Circulators	Heavy duty cast iron

WARNING:
Allow the stove to cool before carrying out any maintenance or cleaning.

40076 GRATE REMOVAL AND INSTALLATION

Turn of the unit and allow it to cool completely. Reach in through the feed door to gain access to the grates. The grates are sitting on top of the bottom brick. Simply remove the old and replace with the new.

40101 GRATE REMOVAL

1. Turn of the unit and allow it to cool completely.
2. Open the cabinet door, the feed door, and the ash pan door.
3. The handle of the cast iron grate is visible when the ash pan door is open.
4. To access the grate, reach into the feed door with your right hand and lift the grate up off of the grate support. With your left hand reach into the ash pan door and support the grate as it is removed from the unit.

40101 GRATE INSTALLATION

1. Slide the grate into position through the ash pan door with your left hand. With your right hand reach into the feed door and lift the grate back onto the grate support.
2. Close the feed door, ash pan door, and cabinet door.
