Why Direct Glazed Fiberglass?

Direct Glazed

When a door is direct glazed, the glass is built directly into the door. Without the need for a rim, paint or stain can be applied right up to the edge where the door meets the glass. It also adds years of life to the door, because glass rims are susceptible to wear over time. A direct glazed door offers the best of both fiberglass and wood, appearing handcrafted without the maintenance.

Look of Real Wood

Our Regency direct glazed textured fiberglass doors are professionally stained and sealed. The door texture looks like real wood, but with the durability of fiberglass.

Simulated Divided Lites (SDL)

A further advancement in fiberglass door technology, simulated divided lites (SDL) divides the single piece glass both internally and externally, giving the illusion of a traditionally hand-crafted door with individual panes and well finished edges. Our Legacy collection is the first of its kind—its grille is built directly into the door, creating a seamless effect on the face of the unit.

Enhanced Security

Enhanced Security

Double bore, security plate and oversized LVL door edge with PVC Cap provides strength, making it more secure and feel higher quality.

Rot-Free System

Rot-Free System

From the door to the composite frame, this composite unit withstands moisture. Fiberglass wraps the door and frame from edge to edge, forming a weather-resistant barrier.

Adjustable Sill

Superior Durability

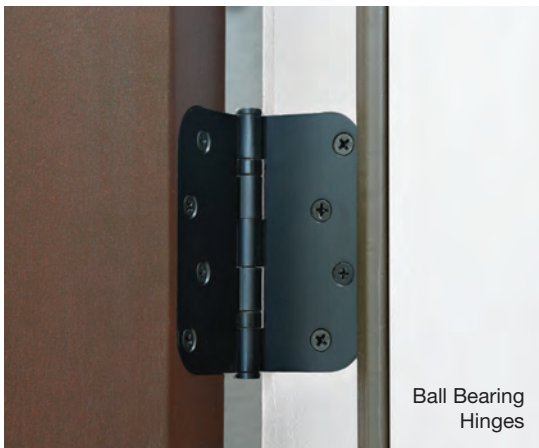

Our fiberglass composite door system is dent resistant and reduces heat buildup.

Energy Efficient

Insulated multi-pane glass offers energy efficiency. High performance weather stripping with adjustable sill provides an airtight seal.

Ball Bearing Hinges

This hardware provides smooth and silent operation, and it prevents sagging over time.

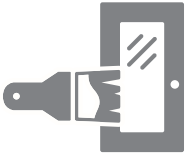

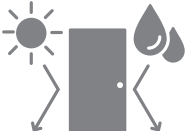

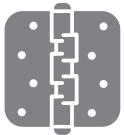

Ball Bearing Hinges

Finishing Made Easy

It's easier than ever to paint or stain your door with the protective film that comes on the glass of all our Regency and Legacy fiberglass doors.

*Oversized LVL door edge with PVC Cap and ball bearing hinges are exclusive to the Regency and Legacy Collection.

As Seen on TV

Our collection of doors have been seen on the some of the most popular home renovation shows.

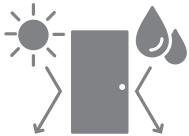

Images shown on this page were professionally finished by homeowner/contractor.

Heat Reflective Finish

The Sun Tech state-of-the-art heat reflective finish is energy efficient. It minimizes heat gain, and meets low Volatile Organic Compounds (VOC) and Environmental Protection Agency (EPA) compliant coating standards.

Sun Tech finish resists scratching and fading. It greatly reduces the risk of distortion and warping caused by heat gain. This high performance finish will resist cracking, peeling, delamination, blistering and flaking.

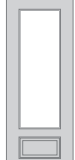

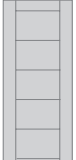

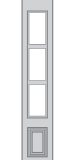

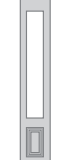

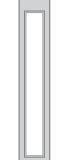

The heat reflective polyurethane coating has been tested by an independent, approved testing facility to meet performance standards.

Warranty Summary & Contact Information

Exterior Door Considerations

Steves & Sons entry doors are designed and built to provide lasting value for your home. Our doors provide a classic look of beauty and elegance for your home entrance. Before making this significant investment in your home, you need to take the following items into consideration when purchasing an entry door.

Exposure to Weather

- Adequate overhang is very critical to the life and performance of any exterior door. A proper overhang will help protect your door from the elements and extend the life of the door. Keep in mind that overhangs are always wise for all doors. See Steves & Sons website for overhang requirements.
- Installing a storm door can cause extreme heat buildup from the sun or trap moisture depending on your environment. Upon inspection, if the installation of a storm door caused damage to the door, that may void the warranty.
- Consult local building codes prior to purchase for any local energy ratings and design pressure requirements.
- Fiberglass doors are more energy efficient than wood doors.

Warranty

Steves & Sons products are designed and built to provide lasting value for your home. We warrant to the original owner, if your Steves & Sons Inc. product exhibits a defect in material or workmanship within the time periods outlined below from the initial purchase.

Product	Door Slab	Glass	Factory Finish
Fiberglass Doors Regency	Lifetime Limited	5 Years	1 Year
Fiberglass Doors Legacy	Lifetime Limited	5 Years	1 Year
Fiberglass Doors Reliant	25 Years Limited	5 Years	1 Year
Steel Doors Element	10 Years Limited	5 Years	1 Year

Steves & Sons, at its sole discretion, will repair, replace warranted door or refund the original purchase price.

STEVES & SONS, INC. MAXIMUM LIABILITY IS LIMITED TO THE AMOUNT OF THE ORIGINAL PURCHASE PRICE AND WILL NOT COVER THE COST OF LABOR, INSTALLATION OR FINISHING FOR ANY REPLACEMENT DOOR.

The manufacturer will not be liable for any door(s) repaired or replaced without prior written consent.

This is a summary of Steves & Sons' warranty. For detailed warranty information, visit stevesdoors.com

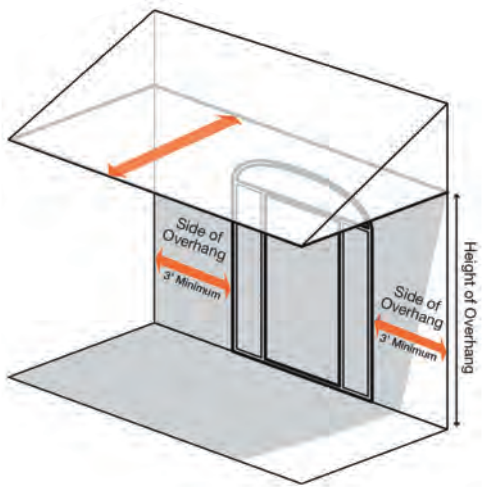

Contact Information

For additional information, warranty details, technical information or stain color samples, please contact Steves & Sons, Inc. Customer Service at: (800) 617-8586
8am - 5pm CST, M - F

Projection of Overhang

Per warranty details, overhang must project half the height of entry or more.

Sill Pan

When recommended overhang is not met, the use of sill pan is required to meet warranty criteria.

Rough Opening (RO)

Always ensure RO is larger than unit Actual Width and Actual Height

Transom Door Units

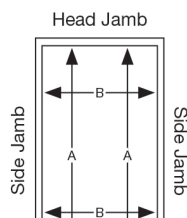

For the Transom Door Height, add 13-3/4" to the Inswing Door Height in the chart

Outswing Door Units

For the Outswing Door Height, subtract 3/4" from the Inswing Door Height in the chart

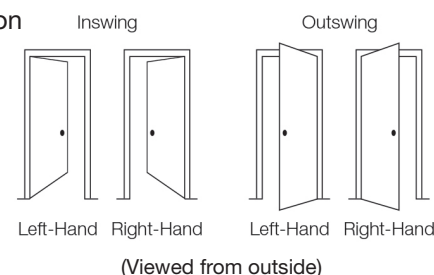

Get the Right Size

When replacing an existing door, measure the height (A) and width (B) of the current door jamb or finished drywall openings for bifolds. If adding a new door, measure the framed opening in a wall the door unit will be installed (rough opening).

Determine Swing Direction

Stand with your back to the side of the door where the hinge pins are exposed. Determine the swing by which arm is located on the same side as the hinges.

Hinge Options

Ball-bearing non-removable 4" hinges with 5/8 radius for smoother operation.

Black/Bronze

Nickel

Door Jambs & Molding Options

- Doors are available with hardwood composite brushed or composite textured jambs.
- Pre-hung in standard 4-9/16" jambs, also available 5-1/4" or 6-9/16" jambs.
- Brickmold and interior casing is available and sold separately.

3 Point Security Locking Systems

High strength - heavy gauge construction with maximum security options, precision engineered mechanism provides better structural performance.
