

1, when stained with dust, sand and other dry dirt, as long as gently pat or vacuum suction net can be, as for granular sand, can be used to brush gently to brush, but can not use hard hand brush, so as not to harm the cloth surface.

2. If it is stained with drinks and fruit juice, it can first absorb the water with hand paper towels, then wipe with warm water to dissolve the neutral detergent, then use a clean soft cloth to dry, and finally dry at low temperature.

3. Dilute the detergent, inject it into the tank, and then spray the detergent fully on the cloth chair.
