

# KUT-IT

- The 2 in 1 tool is used to raise rotors from the top, not the bottom.
- By hand, wrench, or drill turn this tool counterclockwise until it taps the top of any head.
- Pull up and remove the cut grass then flip the tool over, place over any spray head or rotor head and unscrew the cap from the body by turning counterclockwise.
- KUT-IT can also be used as a sod cutter to eliminate grass around most heads.
- Can be stored easily in your service vehicles toolbox!
- This 3-piece tool is made of thick, durable plastic, a reinforced aluminum top to handle torque & resistance.
- A flat side to increase your grip in wet or unstable conditions.
- Has a replaceable blade system reducing replacement costs.
