

# Installing a garbage disposal can be a PAIN!

Working down under the sink, lifting and straining trying to hold up the disposal, center it on the flange, then lift and engage the locking collar... it seems like you need more hands!

## Dr. Disposal makes it so easy! Just 3 simple steps:

Step 1:  
**HOOK**

Drop the hook down through the drain opening into the disposal, then pull up to center it inside the grinding chamber.

Step 2:  
**LIFT**

Raise the disposal up through the drain opening until it engages the sink flange. Then apply tension to the spring.

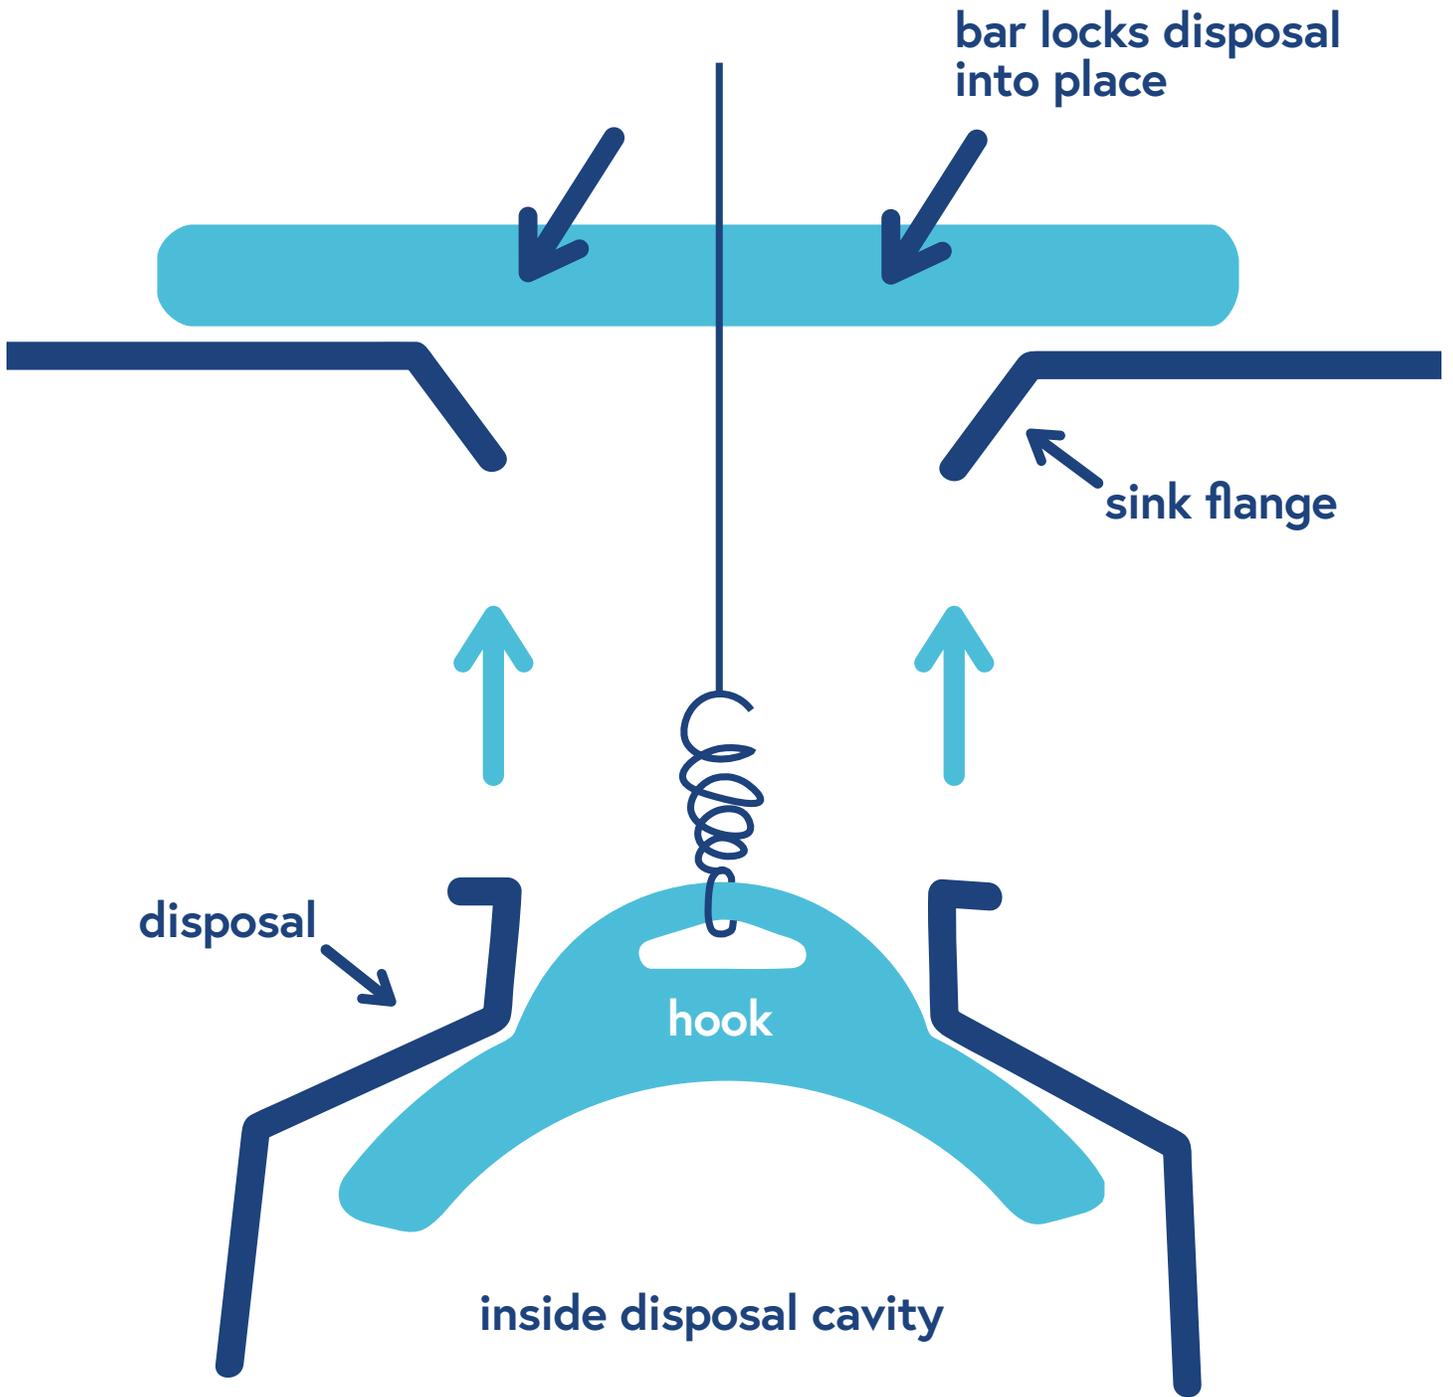

Step 3:  
**LOCK**

Slide the chain into the locking bar, maintaining the tension on the spring, then let go. The disposal is now secure for you to reach under the sink and engage the locking collar with EASE!
