

FEATURES AND BENEFITS

KEY PARTS AND COMPONENTS

A INVERTER DIRECT DRIVE MOTOR

The inverter motor, which is directly connected to the tub, produces little noise and vibration and offers great durability and a long lifespan.

B ULTRA CAPACITY & NEVERUST™ STAINLESS STEEL TUB

The efficient design provides you with ultra large capacity but without making the cabinet larger or the drum any deeper for easy installation and use.

C TURBO WASH™

Turbo Wash™ reduces wash time without compromising performance. The precise drum movements and powerful water jets allow for faster soaking, while the Smart Rinse™ Jet Spray allows for quicker rinsing, saving you up to 20 minutes per load without sacrificing washing performance.

D OXI SANITIZE™

This cycle combines the cleaning performance of the LG washer with oxi-cleaning products, which are released at just the right time to deliver sanitary cycle performance without the excess energy wasted on hot water in typical sanitary cycles. It was certified by the NSF, an independent, third-party testing and certification organization.

E FRONT CONTROL TOUCH PANEL

The front control touch panel is specially designed to be water resistant with LG's HydroShield™ technology, while also delivering ergonomic efficiency by eliminating the need to have to reach for controls as with traditional rear-control units. In addition, the soft touch buttons also add a premium feel.

F SLAM PROOF™ LID

The Slam Proof™ lid is a safety device that closes the lid slowly. The Slam Proof™ hinges allow the lid to close gently and quietly, helping prevent injuries.

G SMART DIAGNOSIS™

If you ever experience an issue with your LG washer, you don't have to worry. The SmartDiagnosis™ feature helps the service center diagnose problems over the phone, or with a simple app on your smart phone, helping you minimize costly, inconvenient service calls.
