

Utility Sink Installation Guide

Please read this guide carefully before installation. Installation should comply with local plumbing and building codes.

Tools Required

- Adjustable wrench
- Screwdriver
- Level
- Plumber's tape (PTFE)
- Silicone sealant
- Bucket or towel

Installation Steps

Step 1: Assemble Stand (If Applicable)

Attach legs or stand components securely and ensure the unit is level.

Step 2: Position Sink

Place the sink onto the stand or mounting surface and confirm stability.

Step 3: Install Faucet

Mount the faucet into pre-drilled holes and tighten connections.

Step 4: Connect Water Supply

Attach hot and cold water lines and check for leaks.

Step 5: Install Drain

Install drain components and connect to plumbing.

Step 6: Seal and Secure

Apply silicone sealant where needed and allow to cure.

Step 7: Final Check

Test water flow and drainage.

Cleaning & Maintenance

Clean with mild soap and water. Avoid abrasives.

Safety

Do not stand on the sink. Periodically inspect connections.
