NATURE'S MIRACLE®

From the maker of NATURE'S MIRACLE® products, the pet stain & odor removing brand you trust...because it works!

1 APPLY

2 WAIT

3 BLOT

People and pets should not be allowed on treated areas until product has dried.

DIRECTIONS FOR USE

Before using, test surfaces to be treated for colorfastness by applying to a hidden area. Wait 5 minutes, then wipe with white cloth. If color is removed from the test area, do not use Nature's Miracle® Stain & Odor Remover on those surfaces. Do not use on untreated hardwood, leather, suede, silk or wool specialty fabrics. Always use this product at full strength. Do not dilute. Always use Nature's Miracle Stain & Odor Remover products first. Other cleaners and detergents may fail and chemically "set" stains that will be impossible to remove.

FOR STAIN REMOVAL

1. Blot up as much of the stain as possible, then thoroughly soak stain with this product.
2. Allow to work for 15 minutes, then blot up stain with a clean cloth.
3. Allow area to dry for 24 hours.
4. While treated areas dry, keep pets away. For severe, old or stubborn stains reapply and cover with a damp cloth for 12 hours prior to blotting up excess liquid. Then allow to dry for 24 hours.

FOR ODOR ELIMINATION

1. Remove excess odor-causing material, then thoroughly soak area with this product. Saturation is important so that this product can penetrate deeply to the odor source. In carpeting, this may mean lifting carpet and applying directly to the pad and floor.
2. Do not wipe up excess.
3. Leave treated area wet and let it air dry. Odor will fade as this product dries. Complete odor elimination only happens when all odor sources are reached.
4. For severe, old or stubborn odors on carpeting or fabrics, saturate a towel with water and lay over the treated area, letting sit for up to 12 hours. This will allow the bacterial enzymatic activity to break down and consume more of the odor.
