

## **Care Instructions**

Well Woven rugs are made with top-quality materials and methods; however, rugs, like all home furnishings, require care and maintenance to keep them in great shape.

The following tips will help you take care of your Well Woven rug and ensure it lasts for years to come:

- Sweep, vacuum, and rinse rug with a garden hose, preferably over a rail to help drain away the water, drying thoroughly before replacing
- Vacuum regularly with non-beater bar vacuum.
- Spot clean as needed
- For spills, remove excess material and blot with a clean cloth dampened with lukewarm water. Repeat with a solution of lukewarm water and dish detergent (or use carpet cleaner). Finish by blotting with water and a clean white cloth.
- Use of a rug pad is recommended to reduce slipping and extend the life of your rug.

## **Unrolling/ uncurling the rug**

- Rug arrives factory rolled and may have creases from packaging and storage. Normally flattens within 5-7 days.
- You can also reduce or remove creasing by rolling the rug, pattern side, up and massaging the creases with your hands. This loosens the backing and helps ease it flat. You can also lay the rug out in a sunny room first; heat helps further loosen the backing
